Dallas, Texas 75202-2733

Dear Ms. Schober:

Subject: RSR Corporation Superfund Site
Operable Unit No. 4
Draft Remedial Investigation Report
Chapters 1 through 3

Enclosed are four copies of draft Chapters 1 through 3 of the OU No. 4 RI report for your review. The draft table of contents for the entire report is also attached (page numbers are not yet included). Please note that the enclosed text contains some italicized notes, some to your attention and some to signify work in progress. In the interest of getting you a draft as soon as possible, we elected to forward these chapters to you prior to completion of the full draft report. In addition, we elected to add notes to the text indicating our intent for changes; all changes will be made in the final report as noted. The attached draft is going through internal senior review concurrent with your review, and it should be considered a work-in-progress.

These first three chapters of the OU No. 4 RI provide an introduction and site background and history, and the OU No. 5 RI Chapters 1 through 3 will be very similar. In the interest of reducing review time, we plan to incorporate your comments on this review into the draft OU No. 5 RI prior to submittal. Please note that you will see very similar chapters in the FS documents. When you receive the FS documents, you may wish to limit review of the first three chapters, and we will ensure that any comments you make on the first three chapters of the RI attached to this letter are also made on the FS documents prior to the final.
